Molafos

Molafos® Dairy M

Molafos Dairy M is a palatable, molasses based production supplement with elevated mineral levels to meet the requirements of a lactating Dairy cow.

Molafos Dairy M Uses

- \checkmark Energy, mineral and vitamin supplement for lactating dairy cows.
- \checkmark Used as a production supplement while there is a good body of forage available.
- ✓ Can be medicated with Monensin, Lasalocid or Flavophospholipol to improve feed efficiency.
- \checkmark Assists in providing dust suppression and providing a more consistent ration, texture and smell.

SUITABLE FOR SPECIES

SUITABLE FOR CATEGORIES: Breeder, Weaner, Maintenance, Grower, Production

Molafos Dairy M Features

- Unique Molafos feed system.
 Excellent carrier of minerals, vitamins, supplements and medications.
- Economical with balance of energy, minerals and vitamins.
- Ingredients are held in solution.
- Molasses based to supply sugars which stimulates appetite and boosts milk production.
- Flows at temperatures as low as -10°C.
- Contains a blend of Inorganic and Organic Minerals for improved availability and rumen bacterial health.
- Rain safe.
- The inclusion of magnesium, salt and trace minerals in a palatable carrier such as molasses ensures cattle will accept these unpalatable but essential nutrients.

Molafos Dairy M Benefits

- Palatable and accepted by stock on all country types.
- Controllable intake and cost allows for a budget to be compiled for the season.
- Suitable for all types of cattle regardless of body condition.
- Encourages stock to forage further and less selectively by promoting rumen bacteria function, ensuring enhanced forage utilisation, increased feed intake and digestion.
- Providing additional phosphorus ensures strong cycles in heifers and cows and enables conception rates to be maximised ensuring reproductive efficiency.
- Ultimate convenience with ease of use. Minimal labour required with flexibility in application.

Molafos

Directions for Use

- Convey directly into the feed bale in the shed; can be fed either by itself or mixed in a feed ration.
- Alternatively pour into open troughs and allow cattle free access.
- Feed out 3 days' supply and do not refill until the 4th day.
- Once intake has stabilised feed out 7 days' supply and do not refill until the 8th day.
- Do not feed to starving or thirsty stock.
- Locate feeding stations away from water to reduce intakes and encourage grazing.

Intakes – These products can be fed directly to livestock at recommended feeding rates Weaners: 1.0 to 1.5 kilogram / head / day Adult Cattle: 1 to 3 kilograms / head / day 1 litre Molafos = 1.32 kilograms
