

Molafos[®] Grazing M Pasture Supplement

Molafos Grazing M is a palatable supplement that is high in Molasses (Energy) with a sound mineral balance and Vitamin E.

Molafos Grazing M Uses

- ✓ Molafos Grazing M is recommended for use with green pasture as a mineral rich molasses based supplement.
- ✓ A high energy, low protein supplement that balances lush, high protein pastures, improving pasture utilisation.
- ✓ A supplement for backgrounding cattle to get stock onto feed sooner and as a post- weaning supplement with hay and or grain for calves and lambs.
- ✓ Commonly fed either as a production supplement while there is a good body of forage available.
- ✓ Can be medicated with Monensin, Lasalocid or Flavophospholipol to improve feed efficiency.

SUITABLE FOR SPECIES

SUITABLE FOR CATEGORIES: Breeder, Backgrounder, Weaner, Finisher

Molafos Grazing M Features

- Unique Molafos feed system. Excellent carrier of minerals, vitamins, supplements and medications.
- Economical and with a balance of energy and minerals.
- Ingredients are held in solution.
- Molasses based – Supplies sugars which stimulate appetite.
- Flows at temperatures as low as -10°C.
- Contains a blend of Inorganic and Organic Minerals for improved availability and rumen bacterial health.
- The inclusion of Magnesium and anionic salts in a palatable carrier such as molasses ensures cattle will accept these unpalatable but essential nutrients.
- Rain safe.

Molafos Grazing M Benefits

- Palatable and accepted by stock on all country types.
- Promotes improved utilisation and feed conversion efficiency of stock on green pasture.
- Controllable intake and cost allows for a budget to be compiled for entire supplement program at commencement.
- Suitable for all types of cattle regardless of body condition.
- Encourages stock to forage further and less selectively by promoting rumen bacteria function, ensuring enhanced forage utilisation, increased feed intake and digestion.
- Ultimate convenience with ease of use. Minimal labour required with flexibility in application.

Directions for Use

- Pour into open troughs and allow cattle and sheep free access.
- Feed out 3 day's supply and do not refill until the 4th day.
- Once intake has stabilised feed out 7 day's supply and do not refill until the 8th day.
- Stock may need to be supplemented with salt (especially sheep) for 1 week to appease any salt craving.
- Do not feed to starving or thirsty stock.
- Locate feeding stations away from water to reduce intakes and encourage grazing out.

Intakes – These products can be fed directly to livestock at recommended feeding rates

Weaners: 0.5 to 1 kilogram / head / day

Adult Cattle: 1 to 2 kilograms / head / day

Sheep and Goats: 100 to 300 grams / head / day

1 litre Molafos = 1.32 kilograms

Molafos Grazing M – Analysis as Fed

Minimum Dry Matter	68%	Minimum Sulphur (S)	0.9%
